## PRODUCT DESCRIPTION

The Kalora Accent inbuilt wood heater has been specifically designed for installation into existing masonry fireplaces overcoming the inefficiencies associated with traditional open fires such as excessive fuel burn, uncontrollable heat levels and energy that is lost straight out of the chimney.

The Accent also accommodates for those who love the look of an inbuilt wood heater but do not have an existing open fireplace. Our zero clearance solutions avail the opportunity to install the Kalora Accent into a timber-framed wall with the need for only minimal clearances.

### PERFECT FOR THE PRE-EXISTING

Designed to fit into existing masonry fireplaces to overcome inefficiencies giving you more control.

### ZERO CLEARANCE OPTION

Allows you to install the Accent into a timber-framed wall with minimal clearances.

### MINIMALIST DESIGN

Clean lines and minimalist features, paired with gentle touch controls, allow the flame to be the focal point of the room.

KALORA Designed and built to last!
