## PRODUCT DESCRIPTION

The Lopi 3615 HO GS2 is the smallest in the line-up. The smaller dimensions of the 3615 make it suitable for smaller room proportions or walls. The decreased size of the 3615 however does not mean a low heat output. With a gas input of 35Mj/hr and ceramic glass for increased radiant heat this smaller linear fireplace packs plenty into the overall width of 914mm.

The 3615 HO GS2 features a glass viewing area of over 850mm in its width with high dancing flames and under lighting whether the fire is on or off.

Like the full Lopi linear range you have the option of just a glass bed in a choice of 4 colours or rock embers. As an option you can add one the additional media option s including a contemporary Driftwood, Traditional Log, Tumbled Stoned or Driftwood Twig & Stones.

Finally you can choose between the black painted fire-back liner, black enamel, silver or Ledgestone to further compliment this stunning fire.
