## PRODUCT DESCRIPTION

The Answer 2020 Inbuilt is a great size for small existing fireplaces. It's size belies its incredible heating capacity. The Answer Inbuilt uses a five-sided convection chamber to distribute heat evenly throughout your home. Cool room air is naturally drawn around the hot firebox, heated, and returned back into the room without using a Fan. The Answer's .05 cubic metre firebox is larger than most other small inserts, so it offers longer burn times with less reloading. This model has a huge viewing area and sleek door design to make viewing and operating this insert easy and enjoyable.

### *Options*

#### **Greenstart**

The GreenStart igniter has made getting your fire burning as convenient as pushing a button. Additionally all of the mess of starting a fire with matches and newspapers is no longer part of the process. The new GreenStart system instantly elevates combustion temperatures within your stove, immediately establishes a draft and eliminates the slow and smoky typical wood fireplace start up. Never before has getting your wood fire burning been so simple.

#### **Fan Option**

A front mounded 180 CFM fan can be added for an additional cost, to increase the convection heat. This fan is thermostatically controlled and fully variable.
