PRODUCT DESCRIPTION

The mid-sized Evergreen wood stove with its gentle curved lines complements any home's decor while artfully presenting heavy gauge steel unibody construction and a cast iron door. The result is exquisite and reliable heating for decades to come.

With the standard bypass damper we've given you full control over the flow of smoke inside your Evergreen. Simply open the bypass via the pull ring located just above the door to draw smoke away from the door and up the chimney. Close the damper to drive smoke around the baffle and initiate the efficient secondary combustion process.

Your burn rate, from a mellow overnight burn to a large rolling fire, is effortlessly managed by a single air control knob found below the stove's door.

Specifications

Construction	6.35 to 4.76mm Steel Plate
Firebox Size	.062 Cubic Metres
GreenStart™ Compatible	Optional
Fan	Included as Standard - Rear Mounted

Options

Greenstart

The GreenStart igniter has made getting your fire burning as convenient as pushing a button. Additionally all of the mess of starting a fire with matches and newspapers is no longer part of the process. The new GreenStart system instantly elevates combustion temperatures within your stove, immediately establishes a draft and eliminates the slow and smoky typical wood fireplace start up. Never before has getting your wood fire burning been so simple.

Outside Air Kit

Ideal for air tight homes as it allows the air to be drawn from outside of the home to the fireplace.
