PRODUCT DESCRIPTION

The Liberty is a large stove made for heating large homes and living spaces. At only 1.3 grams of emissions per hour, it is one of the cleanest burning large stoves approved for use in Australia.

The huge firebox and fire viewing area allow you to load wood up to 61cm long and fully appreciate the splendour of the fire. It also features a single control to adjust air flow, making it easy to achieve burn times up to 12 hours. The Liberty's step-top design is enchanting yet functional, providing cooking and warming surfaces as well as radiant and convective heat.

The optional rear mounted 400cfm fan will add a punch of convection heat for those that need it.

Available with the GreenStart ignition system for the modern wood burner; just load your wood and push a button! We've completely eliminated slow, cracked open door startups and laboring over fickle newspaper.

In addition, the by-pass damper feature helps aid you in lighting the fire faster and assists in preventing smoke-backs while starting and reloading.

This new design features a large ash pan adding even more practicality to this new model.

Specifications

Firebox Size	9.5 - 6mm Steel Plate
GreenStart™ Compatible	Optional
Fan	Optional Rear Mounted 400CFM

Options

Greenstart

The GreenStart igniter has made getting your fire burning as convenient as pushing a button. Additionally all of the mess of starting a fire with matches and newspapers is no longer part of the process. The new GreenStart system instantly elevates combustion temperatures within your stove, immediately establishes a draft and eliminates the slow and smoky typical wood fireplace start up. Never before has getting your wood fire burning been so simple.

Rear Mounted 400CFM Fan

The optional rear mounted 400cfm fan will add a punch of convection heat for those that need it.

Outside Air Kit

Ideal for air tight homes as it allows the air to be drawn from outside of the home to the fireplace.
