PRODUCT DESCRIPTION

The Lopi Rockport combines cast iron beauty with optimum heat performance and solid construction to bring you the perfect mid-sized wood stove.

The Rockport features an elegant, clean design with beautiful European castings, bold lines and a gentle curved shape that will complement any homes decor. This heavy duty stove features a large firebox, 165 square inch viewing area, easy-to-use ash pan and a full convection heat exchanger that provides maximum radiant and convective heat.

The Rockport features revolutionary patented Hybrid-Fyre technology, making it one of the cleanest burning and most efficient wood stoves in the world! The Rockport boasts an impressive 0.7 grams of emissions per hour and high overall efficiency of up to 71%.

This allows you to use less wood while burning hotter fires for longer periods of time, saving you money on your heating bill.

Lopi is devoted to keeping you and your family warm. The Rockport is artfully crafted from the finest grade materials like iron, steel, real masonry brick and crystal clear ceramic glass, ensuring many years of dependable warmth and comfort for your home, even when the power goes out.

You can even use the top of the stove as a great cook-top surface. We know you're going to love it.

Options

[Greenstart](#)

The GreenStart igniter has made getting your fire burning as convenient as pushing a button. Additionally all of the mess of starting a fire with matches and newspapers is no longer part of the process. The new GreenStart system instantly elevates combustion temperatures within your stove, immediately establishes a draft and eliminates the slow and smoky typical wood fireplace start up. Never before has getting your wood fire burning been so simple.

Outside Air Kit

Ideal for air tight homes as it allows the air to be drawn from outside of the home to the fireplace.
